Our Contact Center: 8002 8004
Competent and fast service, 24/7

FAQ: www.post.lu/support

Wait until you receive the confirmation SMS before starting the installation.

Step 1

Unpack the Homebox and check that all accessories are present.

Homebox+

Network cable

Power cable

Step 2

Plug the network cable into the POST socket.

Several connection types are possible. Choose your POST socket and follow the steps.

Step 3

Plug the network cable into the Homebox, then connect it to the power supply.

HOMEBOX+

Step 4

Wait until the LED remains solid white for approximately 1 minute.

It may take up to 15 minutes for a connection to be established and for your Homebox to be ready to operate.

Step 5

Connect to the WiFi network.

The login credentials can be found underneath your Homebox.

Step 6

Connect your computer and phone(s) to the Homebox.

To do this, refer to your device's manual.
It explains all the steps to follow.
